Re: Correction of Transmittal Letter Subject, Hanford Double-Shell Tank Waste Ventilation Order DE05NWP-001, Rev. 1

- References: 1. USDOE-RL Letter 07-ESQ-091, *Request for Modification to Non-Radiological Air Emissions Notice of Construction (NOC) Application for Operation of New Ventilation Systems in AN and AW Tank Farms*, dated May 16, 2007.
2. Ecology Letter, *Approval of Criteria and Toxic Air Emissions Notice of Construction (NOC) Application, Hanford Single-Shell Tank Waste Retrieval*, dated July 31, 2007.

Dear Ms. Olinger:

The United States Department of Energy - Office of River Protection petitioned for approval of a Notice of Construction modification for the ventilation of Hanford Double-Shell Tank Waste operations for the 241-AN and 241-AW Tank Farms (Reference 1). Ecology issued approval for the modification on July 31, 2007 (Reference 2).

Typographical error on our part erroneously identified the subject of our letter as "Approval of Criteria and Toxic Air Emissions Notice of Construction (NOC) Application, Hanford Single-Shell Tank Waste Retrieval." The subject line should have been "Approval of Criteria and Toxic Air Emissions Notice of Construction (NOC) Application, Hanford Double-Shell Tank Waste Ventilation, AN and AW Farms."

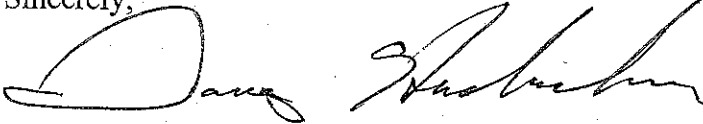

Please accept this correction recognizing that a separate authorization was simultaneously issued for your Single-Shell tank farm retrieval operations under Order DE05NWP-002, Rev. 2, with the same, but correctly applied, subject line.

This correction does not impact the content or enforceability of the subject ORDER.

Ms. Shirley Olinger
